

Asbestos Policy

1. Asbestos is present on the Woodside Baptist Church site only on the roofs of the 'Fellowship Hall' and the 'Outreach Hall' where asbestos sheets were used.
2. The tiles are a concrete / Chrysotile (white) asbestos mix.
3. Any work requiring pressure on the roof will be done with appropriate boards to spread the load.
4. The tiles will be visually assessed every year for stability and to ensure that they are undisturbed.
5. The assessment will be carried out by church members with professional building or safety expertise
6. In the event of flaking or deterioration being observed, a professional assessment of the tile condition will be obtained.
7. If the condition of a roof is found to be unstable the entire roof will be removed and replaced with an approved material.

Policy adopted by CBM 24/09/07
